Technological Developments

Infotrans has a historical background of 30 years of investigation and prospective, specialized in the fields of goods logistics and transportation by all modes: maritime, road, rail, air, automotive, public transport and mobility as well as in the travel and tourism sectors in Spain, Portugal and Andorra, and the rest of the world through our international portal sites.

During this period, more than 200.000 real visits have been paid to the 250 most important cities and towns in the Iberian Peninsula and its Islands: Balearic, Canary, Açores and Madeira Archipelagos.

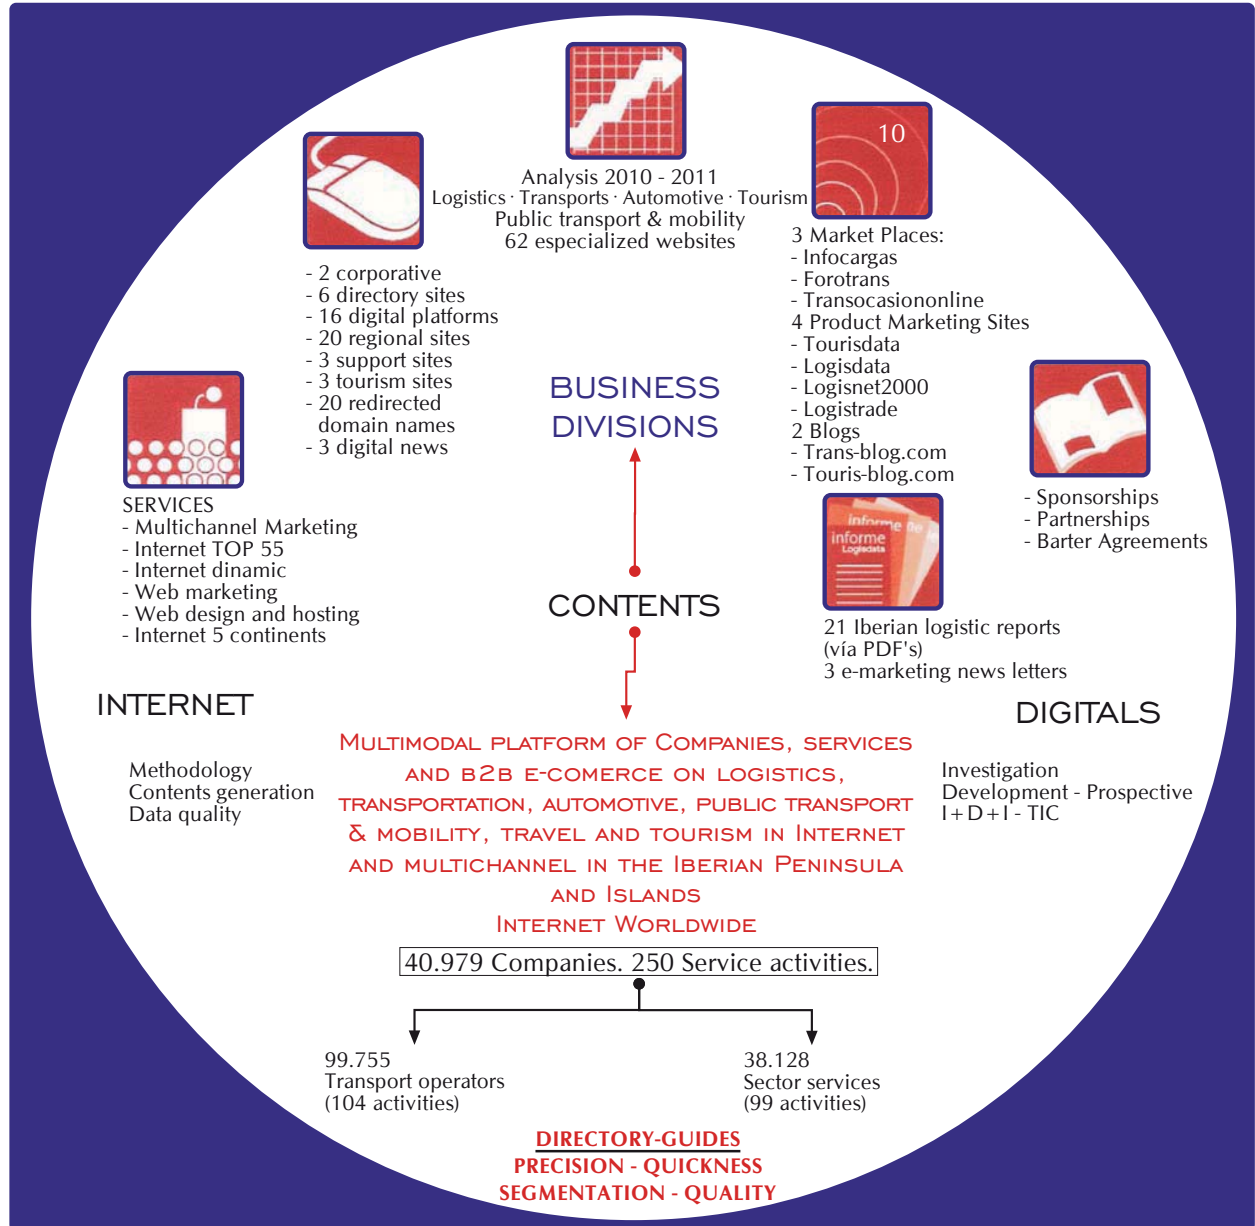

Since 1996 and thanks to the relevant technological capacity reached, Infotrans has developed 62 specialized portal sites in the different areas of above mentioned sectors, which have been highly and very satisfactorily valued by Corporate Groups, Organisms and Associations with which some strategical contracts and agreements have been established as an added value to Infotrans, as the first multimodal platform of companies, services and B2B e-commerce on transportation, travel and tourism in Internet and multimedia in the Iberian Peninsula and islands.

During 2007 Infotrans faced with success the digitalization of all procedures involved in the company operations: marketing, designing and administration as a result of its actual leadership in Internet Business.

Infotrans has always pretended to transmit all clients and users in general the importance of the contents of the operated portal sites (more than 50.000 companies) in the areas of major strategical value for the Iberian economy and its worldwide expansion resulting from Infotrans accumulated knowledge and business credits, after 30 years of investigation and hard work.

WEBSITES NETWORK

STRATEGICAL INTELLIGENCE

The clients potential of **Infotrans** is about 40.000 companies in Spain, Portugal and Andorra, classified in more than 250 activities (road, maritime, rail, air and express, as well as logistics services to the sectors).

The main **Infotrans** business value is that of its complete digitalization of its "online" database with which any company procedure can be carried out such as: marketing, designing, administration, control and filing).

Infotrans main business lines are: Internet Top 55, Internet-dynamic, Internet for agencies, multichannel directories, Internet 5 continents, sponsors Logisdata, logistic reports, Web design, domain names-housing, Web marketing, e-mail campaigns, company newsletters, sales control and follow-up and digital design.

*Considering all **Infotrans** business developments and the strategical intelligence reached in the technical performance of 62 vertical portal sites with its own means since 1996 just starting 2010, **Infotrans** has only exploited a 10% of its potentialities to grow at an immediate future.*

Infotrans capital "vessel" is **www.transportes.com**, being an absolute leader in contents and clicks either direct or indirectly, as since 1980 has been within the three first positions in the main searchers as *Google*, *Yahoo*, etc.

Infotrans leadership in new online marketing multichannel systems allows the group to take over an optimum position for faster achievements, at a near future.

TRANSPORT MARKET EXCHANGE

The traditional ways of looking for business in the transportation and logistics sectors have actually nothing to do with the past. New technologies, e-commerce and market places online have broken away with telephone contacts and personal visits.

Nowadays, transport business are handled mostly through what is defined as “transport market exchange” or “freight Exchange”. You may use them in Spanish, Portuguese and English.

www.transocasiononline.com

Transocasiononline.com is a stock purchase and sale of any motor vehicles and road transport. It contains everything related to these activities. Includes major operators of commercial vehicles sales in Europe, and a directory of companies in the automotive and other classified with transport companies in 250 different modalities of Spain, Portugal and its islands, over Andorra. (Over 50,000 in total).

www.infocargas.com

Infocargas is a freight exchange offers a means of transportation of goods for free: trucks, containers and groupage complete air, sea and rail, as well as urgent combined between modes, for general use by road hauliers, shippers, consignees, freight forwarders, as well as airlines and rail and intermodal operations. Also, any industrial or commercial enterprise. Likewise, the parties involved can integrate their own charges for the contract by other carriers or agents. Infocargas therefore offers multimodal treatment from any European country to obtain the best deals of all means of transport routes (road, sea, air, intermodal and urgent) for use as an absolutely neutral for operations to / from any destination / origin in the world, at no cost.

Forotrans is a trade portal, business management and business contacts in all fields of transport and freight logistics.

PRODUCT MARKETING PORTALS

www.logisnet2000.com

Logisnet2000.com was developed in early 2000 to provide the employer and logistics professionals, travel and tourism and transport in general by all means a full service online achievements: domain registration, email and design and hosting, search engine optimization, design of messages to digital offerings, databases qualified for industrial and services companies design newsletters and web development projects and CRM's Internet business.

www.logisdata.eu

Contains 21 reports logisdata.eu logistics, namely: 17 autonomous communities and 2 autonomous cities Spanish, plus Portugal and Andorra, whose contents can be viewed directly on the web, as well as the most important links from around the world and the logistic maps of the Iberian peninsula and its islands.

There is the possibility to sponsor any of the editions by inserting exclusive advertising and printed digitally in number from 100 to 1000 copies.

www.logistrade.net

These sectors are: transportation and logistics, construction and public works, technology and communications, automotive, railway industry, shipbuilding, maintenance, storage and packaging, energy and petroleum, computer and internet, business events, corporate training, trade , marketing and advertising, media, travel and tourism, multi-enterprise, agencies, etc. There is also the leading vertical portals in the areas specified.

TRAVEL & TOURISM

www.logistour.com

Logistour.com is the specialized division of Infotrans in the travel and tourism world by all modes of transport.

The traditional publications on tourism (guides, magazines, panflets, etc) by millions are starting to lose the immediate interest for travellers as a consequence of internet advance and multimedia communications, mainly amongst more and more young people travelling everywhere.

Logistour was initiated in 2000 and is based on a historical analysis regarding means and users behaviours, orientating their business online towards multimedia information and multichannel marketing.

www.touristalia.com

Touristalia.com was born on occasion of FITUR99 and after 3 years of investigation and hard work, most of the travel and tourism operators in Spain and Portugal were registered which are now over 4.000 webs linked.

This project at the moment represented one of the first initiatives to present a portal-platform, wholesale wise in internet, whereby, THE WEB was the unique protagonist for carrying out procedures, communications and marketing in all fields of people transportation by all modes, as well as tourism to/from any part of the world. There exist thousands of individual webs of companies that offer their services, as well as portal sites and reservation centers for the majority of travel and tourism needs.

www.conmagia.com

Conmagia.com is defined as an informative portal of stays that stand out for his history, his renewed antiquity, his beauty and, especially his characteristics of dream, in any place of a population, in the mountain, in the field or in the littoral, lengthways and width of Spain, Portugal and Andorra, besides his architectural singularity in comparison with other establishments standard, joined to the excellence of his homeloving environment and the esquisitez of a stay “Con Magia”.

To sail for www.conmagia.com means to enjoy the history, the culture and the nature and to enjoy simultaneously the best musical pieces of all the times. Do not stop submerging in any of the selected places and “ wake his six senses up “.

Multimedia Conmagia.com consists of three simultaneous channels of dissemination:

1. Internet portal, which currently contains more than 200 rooms, shows, as an illustration of virtual positioning in all geographic areas of the Iberian peninsula and its islands.
2. Information Guide on paper 17 x 24cm size with identical content to the Internet, printed digitally from the Web-based with a circulation of 5,000 copies for dissemination of conmagia.com through travel agencies, tourist offices. From 2011 it also sold in kiosks.
3. Conmagia magazine supplement these resources (Internet + phone) as an overall average divulgación, being freely distributed on a quarterly basis. The set-GUIDE MAGAZINE will be included in the distribution chains of major centers in 2012

All the stays in conmagia.com appear simultaneously throughout the world www.touristalia.com portal, wholesale websites on the channel “LODGING” clicking “conmagia” as well as in the companion guide with a circulation of 5,000 copies a year, since 1996 when it was built www.touristalia.com on the Internet and contains over 10,000 websites in the tourism sector.

www.tourisdata.eu

Informative web on tourist information of interest for professionals and travelers of any origin, related to the Autonomous Spanish Communities, as well as with Portugal and Andorra.

DIGITAL NEWS

- These are three and only means for Spain and Portugal for self-managed nature, in which the generator itself can integrate the news media without a password or special permit.
- Integrate content from both media should be linked to the Internet world, new technologies and communication related to transport, logistics, travel, tourism, public transport and mobility, exclusively.

- Information will also support any news related to developments in public bodies and associations in general, as well as relevant professional events.
- We offer three channels fully differentiated strategic sectors:

www.transpress.com

Transpress.com is an innovating news service, the contents of which may only refer to new technologies, internet developments, communications and marketing online, related to transportation, automotive and logistics aspects. Press releases are to be generated by any company, association, institution, intermodal centers and sent through transpress.com for self-publication. No password es needed. Spanish plus other regional languages are accepted plus Portuguese, French, English and Italian (no translation is done).

www.tourispress.com

Tourispress.com is an innovating news service, the contents of which may only refer to new technologies, internet developments, communications and marketing online, related to transportation, automotive and logistics aspects. Press releases are to be generated by any company, association, institution, intermodal centers and sent through transpress.com for self-publication. No password es needed. Spanish plus other regional languages are accepted plus Portuguese, French, English and Italian (no translation is done).

www.infotransporte.com

Infotransporte.com is the first digital information exclusively dedicated to the public sector urban transport of people and goods by any means: carretera, rail, sea, air and waterways throughout Europe, neutral and languages, Spanish, Catalan, Euskara, Galician, Valencian, Bable, Aragonese, Portuguese, English, French and Italian. The release may be incorporated in a collaborative way through Infotransporte.com by any company, association, body, etc., But will not be published when the information comes from any political party that is mentioned.

ONLINE MARKETING PROSPECTIVE - EVOLUTION 2009-2012

ADVERTISING INVESTMENT IN SPAIN DURING 2007 WAS ABOUT 14.500 MILLION EUROS. THE MARKETING ONLINE BUSINESS REPRESENTED IN SPAIN 320 MILLION EUROS. THE QUICK EVOLUTION OF INTERNET INVESTMENT WILL REACH A 10% OF THE TOTAL MARKET FIGURES WHICH WILL REACH AN AMOUNT OF 22.000 MILLION EUROS IN 2012.

**INVESTMENT PROSPECTIVE
ONLINE MK 2012**
MILLIONS EUROS

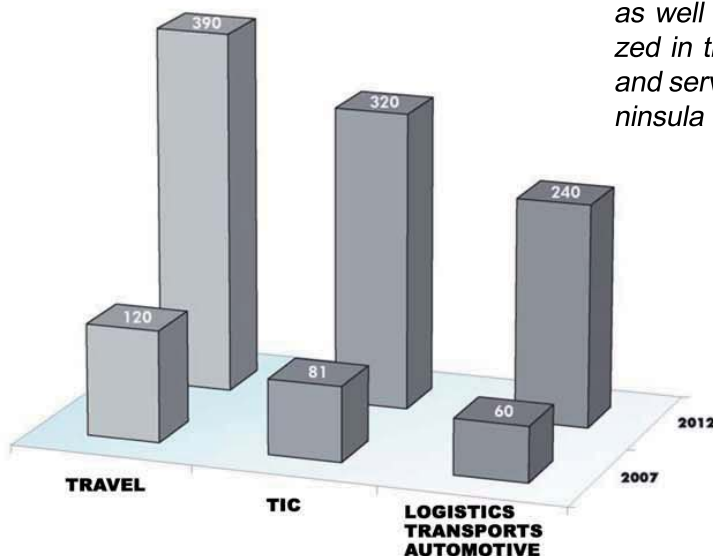

ANALYSIS

Internet accessibility easiness and quickness for 30 million of Spanish internauts and 2 million companies and official departments which will use this tool by 2012 in the search of information, analysis and comparative article prices, will produce, as a consequence an important increase in online marketing. Investment, specially in the TIC, travel and logistics activities. Strange as it might be, in the logistics sector there is only one specialized Portal site, www.transportes.com starting in 1995 (15 years of online activity).

Apart from www.transportes.com, Infotrans operates other 61 websites related to goods transport. Automotive and Logistics, public transport and mobility, as well as travel and tourism, specialized in the different geographical areas and service activities in the Iberian Peninsula and Islands.

**INVESTMENT PROSPECTIVE
ONLINE MK 2012**
MILLIONS EUROS

THE MULTIMEDIA ONLINE MARKETING SYSTEMS DEVELOPPED BY INFOTRANS, SINCE 1995, ARE TO BE CONSIDERED AS THE NECCESARY ANSWER TO INVESTMENT RETURNS FOR INTEGRAL MARKETING BUSINESS FOR ANY COMPANY.
